ELSEVIER

International Journal of Mass Spectrometry 207 (2001) 243–245

International Journal of Mass Spectrometry

Subject Index

Absorption model
Mechanisms of energy deposition in infrared matrix-assisted laser desorption/ionization mass spectrometry, 73
Appearance energy
Time-of-flight mass spectrometry study of the Fragmentation of valence shell ionised nitrobenzene, 223
Atomic weight
Absolute isotopic composition and atomic weight of dysprosium, 137

Benzene and toluene
Measurements of benzene and toluene in ambient air using proton-transfer-reaction mass spectrometry: calibration, humidity dependence, and field intercomparison, 167

Cations
Swarm experiment on ionized water clusters, 97
Chemical ionization
Gas phase reactions of negative ions with $ClONO_2$, 205
Chlorine nitrate
Gas phase reactions of negative ions with $ClONO_2$, 205
CID threshold measurements
Electrospray mass spectrometry beyond analytical chemistry: studies of organometallic catalysis in the gas phase, 125
Cluster ions
Energetics of the dehydration of nitrile-alcohol proton-bound dimers from ion/molecule reaction kinetics, 195
Ion/molecule reaction kinetics using a modified Finnigan GCQ ion trap mass spectrometer: the energetics of the dehydration of proton-bound alcohol dimers, 183
Production, dissociation, and gas phase stability of sodium fluoride cluster ions studied using electrospray ionization ion trap mass spectrometry, 41
Clusters
Swarm experiment on ionized water clusters, 97
Collision-induced dissociation (CID)
Competing mechanisms for methyl cation formation upon collision-induced dissociation of protonated acetaldehyde, 69

Production, dissociation, and gas phase stability of sodium fluoride cluster ions studied using electrospray ionization ion trap mass spectrometry, 41

Desorption
Effectiveness of atomic and polyatomic primary ions for organic secondary ion mass spectrometry, 111
Destruction cross sections
High-energy collisions of multiply charged lysozyme ions in gases, 31
Dissociation
Swarm experiment on ionized water clusters, 97
Dissociation mechanisms
Competing mechanisms for methyl cation formation upon collision-induced dissociation of protonated acetaldehyde, 69
Dynamic trapping
Dynamic ion trapping in a cylindrical open cell for Fourier transform ion cyclotron resonance mass spectrometry, 57
Dysprosium
Absolute isotopic composition and atomic weight of dysprosium, 13

Electron-impact ionization
High-resolution analysis of the kinetic energy distribution of fragment ions produced by dissociative ionization of propane, 145
Electrospray ionization
Electrospray mass spectrometry beyond analytical chemistry: studies of organometallic catalysis in the gas phase, 125
Production, dissociation, and gas phase stability of sodium fluoride cluster ions studied using electrospray ionization ion trap mass spectrometry, 41
Electrostatics
Determination of analytic potentials from finite element computations, 19
Energetics
Energetics of the dehydration of nitrile-alcohol proton-bound dimers from ion/molecule reaction kinetics, 195

1387-3806/01/$20.00 © 2001 Elsevier Science B.V. All rights reserved
PII S1387-3806(00)00240-2

Ion/molecule reaction kinetics using a modified Finnigan GCQ ion trap mass spectrometer: the energetics of the dehydration of proton-bound alcohol dimers, 183
Energy-resolved mass spectrometry
Competing mechanisms for methyl cation formation upon collision-induced dissociation of protonated acetaldehyde, 69
Ethyl lactate
Formation and decomposition of the *m/z* 75 fragment ions from the molecular ion of ethyl lactate, $CH_3CH(OH)COOCH_2CH_3$, 217

Flowing afterglow
Gas phase reactions of negative ions with $C1ONO_2$, 205
Fourier transform ion cyclotron resonance
Dynamic ion trapping in a cylindrical open cell for Fourier transform ion cyclotron resonance mass spectrometry, 57

Gas phase stability
Production, dissociation, and gas phase stability of sodium fluoride cluster ions studied using electrospray ionization ion trap mass spectrometry, 41
Gas-phase conformation
High-energy collisions of multiply charged lysozyme ions in gases, 31

High-energy collisions
High-energy collisions of multiply charged lysozyme ions in gases, 31
$H_3O^+ \bullet (H_2O)n$ cluster ion distribution
Measurements of benzene and toluene in ambient air using proton-transfer-reaction mass spectrometry: calibration, humidity dependence, and field intercomparison, 167
Humidity dependence
Measurements of benzene and toluene in ambient air using proton-transfer-reaction mass spectrometry: calibration, humidity dependence, and field intercomparison, 167
Hydrocarbons
High-resolution analysis of the kinetic energy distribution of fragment ions produced by dissociative ionization of propane, 1454

Ion optics
Determination of analytic potentials from finite element computations, 19
Ion trap
Determination of analytic potentials from finite element computations, 19
Ion trap mass spectrometer
Energetics of the dehydration of nitrile-alcohol proton-bound dimers from ion/molecule reaction kinetics, 195
Ion/molecule reaction kinetics using a modified Finnigan GCQ ion trap mass spectrometer: the energetics of the dehydration of proton-bound alcohol dimers, 183
Ion yields
Relative ion yields for SIMS analysis of trace elements in metallic Fe, Fe-Si alloy, and FeSi, 153
Ion-molecule chemistry
Electrospray mass spectrometry beyond analytical chemistry: studies of organometallic catalysis in the gas phase, 125
Ion/molecule kinetics
Energetics of the dehydration of nitrile-alcohol proton-bound dimers from ion/molecule reaction kinetics, 195
Ion/molecule reaction kinetics using a modified Finnigan GCQ ion trap mass spectrometer: the energetics of the dehydration of proton-bound alcohol dimers, 183
Ion/molecule reactions
Gas phase reactions of negative ions with $C1ONO_2$, 205
Isotopic abundance
Absolute isotopic composition and atomic weight of dysprosium, 13

Kinetic energy distributions
High-resolution analysis of the kinetic energy distribution of fragment ions produced by dissociative ionization of propane, 145
Kinetic isotope effects
Competing mechanisms for methyl cation formation upon collision-induced dissociation of protonated acetaldehyde, 69

Large biomolecules
High-energy collisions of multiply charged lysozyme ions in gases, 31
Laser ionization
Time-of-flight mass spectrometric detection of mono- and di-substituted benzenes at parts per million concentrations by way of liquid microjet injection and laser ionization, 1
Liquid microjet
Time-of-flight mass spectrometric detection of mono- and di-substituted benzenes at parts per million concentrations by way of liquid microjet injection and laser ionization, 1

Mass spectrometry
Absolute isotopic composition and atomic weight of dysprosium, 137
Time-of-flight mass spectrometric detection of mono- and di-substituted benzenes at parts per million concentrations by way of liquid microjet injection and laser ionization, 1
Matrix effects

Relative ion yields for SIMS analysis of trace elements in metallic Fe, Fe-Si alloy, and FeSi, 153
Matrix-assisted laser desorption/ionization mass spectrometry with infrared lasers (IR-MALDI-MS)
Mechanisms of energy deposition in infrared matrix-assisted laser desorption/ionization mass spectrometry, 73
Metastability
Effectiveness of atomic and polyatomic primary ions for organic secondary ion mass spectrometry, 111
MIKE spectrometry
Formation and decomposition of the *m/z* 75 fragment ions from the molecular ion of ethyl lactate, $CH_3CH(OH)COOCH_2CH_3$, 217
m/z 75 ion
Formation and decomposition of the *m/z* 75 fragment ions from the molecular ion of ethyl lactate, $CH_3CH(OH)COOCH_2CH_3$, 217

Nitric acid
Gas phase reactions of negative ions with $C1ONO_2$, 205

Open cell
Dynamic ion trapping in a cylindrical open cell for Fourier transform ion cyclotron resonance mass spectrometry, 57
Optical parametric oscillator
Mechanisms of energy deposition in infrared matrix-assisted laser desorption/ionization mass spectrometry, 73

Photoionization
Time-of-flight mass spectrometry study of the Fragmentation of valence shell ionised nitrobenzene, 223
Polyatomic primary ions
Effectiveness of atomic and polyatomic primary ions for organic secondary ion mass spectrometry, 111
Proton transfer reaction-mass spectrometry (PTR-MS) calibration
Measurements of benzene and toluene in ambient air using proton-transfer-reaction mass spectrometry: calibration, humidity dependence, and field intercomparison, 167
Protonated aldehydes
Competing mechanisms for methyl cation formation upon collision-induced dissociation of protonated acetaldehyde, 69
Protonated ethyl formate
Formation and decomposition of the *m/z* 75 fragment ions from the molecular ion of ethyl lactate, $CH_3CH(OH)COOCH_2CH_3$, 217
Protonated glyoxylic acid
Formation and decomposition of the *m/z* 75 fragment ions from the molecular ion of ethyl lactate, $CH_3CH(OH)COOCH_2CH_3$, 217

Resonance-enhanced multiphoton ionization
Time-of-flight mass spectrometric detection of mono- and di-substituted benzenes at parts per million concentrations by way of liquid microjet injection and laser ionization, 1

Secondary ion mass spectrometry (SIMS)
Effectiveness of atomic and polyatomic primary ions for organic secondary ion mass spectrometry, 111
Relative ion yields for SIMS analysis of trace elements in metallic Fe, Fe-Si alloy, and FeSi, 153
Sodium fluoride
Production, dissociation, and gas phase stability of sodium fluoride cluster ions studied using electrospray ionization ion trap mass spectrometry, 41
Synchrotron radiation
Time-of-flight mass spectrometry study of the Fragmentation of valence shell ionised nitrobenzene, 223

Tandem mass spectrometry
Electrospray mass spectrometry beyond analytical chemistry: studies of organometallic catalysis in the gas phase, 125
Threshold fluence
Mechanisms of energy deposition in infrared matrix-assisted laser desorption/ionization mass spectrometry, 73
Time-of-flight
Time-of-flight mass spectrometric detection of mono- and di-substituted benzenes at parts per million concentrations by way of liquid microjet injection and laser ionization, 1
Trace elements in metal matrix
Relative ion yields for SIMS analysis of trace elements in metallic Fe, Fe-Si alloy, and FeSi, 153
Transition-metal catalysis
Electrospray mass spectrometry beyond analytical chemistry: studies of organometallic catalysis in the gas phase, 125
Trapped ion cells
Dynamic ion trapping in a cylindrical open cell for Fourier transform ion cyclotron resonance mass spectrometry, 57

Water
Swarm experiment on ionized water clusters, 97
Wavelength dependence
Mechanisms of energy deposition in infrared matrix-assisted laser desorption/ionization mass spectrometry, 73
